Activité : pendule

On admet les formules suivantes :

•
$$\cos(a+b) = \cos(a) \times \cos(b) - \sin(a) \times \sin(b)$$

$$^{\bullet} \ \lim\nolimits_{h \to 0} \frac{\cos(h)}{h} = 0$$

$$\bullet \ \lim_{h \to 0} \frac{\sin(h)}{h} = 1$$

$$\mathrm{Si}\; f(x)=\cos(x)\text{,}$$

$$f'(x) = \lim_{h \to 0} \frac{\cos(x+h) - \cos(x)}{h}$$
$$= \lim_{h \to 0} \frac{\cos(x)\cos(h) - \sin(x)\sin(h) - \cos(x)}{h}$$
